PROFILE SUMMARY

- AI/ML and Full-Stack Software Engineer with hands-on experience across LLM training, Retrieval-Augmented Generation (RAG), AI agents, and production web application development.
- Proven track record building and evaluating AI systems including full-stack code generation agents, multi-agent workflows, and RLHF-based model evaluation.
- Skilled in Python, JavaScript, PyTorch, Hugging Face Transformers, LangChain/LangGraph, FastAPI, React, and AWS; co-founder experience shipping a full-stack product to 100+ users.

EXPERIENCE

Invisible Technologies | Remote, United States | 26 March 2024 – 1 February 2026

Advanced AI Data Trainer (Full-Stack Developer)

- Delivered prompt-engineered feedback and developed targeted datasets and coding tasks to align LLM outputs with full-stack development standards, enhancing reasoning, code generation, and AI agent performance for FAANG-level clients.
- Developed Docker-based execution environments and evaluated AI-powered web development agents (Firebase Studio Prototyper, Jules) by validating AI-generated applications and providing structured coding tasks and human feedback.
- Maintained documentation for evolving project scopes and mentored new team members on evaluation techniques and model improvement goals.

CreatorKhoj | Kathmandu, Nepal | January 2026 – Present

Co-founder

- Co-founded CreatorKhoj, an MVP platform connecting brands with content creators for campaign discovery and collaboration; designed the end-to-end system architecture, including authentication, campaign management, and admin workflows.
- Worked closely with creators and brands to gather feedback, prioritize features, and continuously improve the product.
- Successfully onboarded 100+ content creators within the first month and facilitated early brand collaboration opportunities.

Mindrift (Toloka AI) | Remote | Freelance (Contract)

AI Annotator

- Evaluated LLM outputs using RLHF methodologies and comparative response ranking; assessed AI agent reasoning across multi-step workflows.
- Evaluated AI-generated images and videos for realism, consistency, and motion quality.

Bajra Technologies | Kathmandu, Nepal | January 2024 – July 2024

Associate Software Engineer, AI

- Developed reports and API integrations within the Odoo ERP ecosystem to streamline HRMS business workflows; boosted accuracy of an in-house speaker recognition model from ~20% to ~86% on 2/3 subsets through architecture and data augmentation improvements.
- Researched and developed LLM training and inference pipelines for Nepali LLM components using PyTorch Lightning and Hugging Face, creating custom tokenizers and evaluating transformer-based language models; scraped large-scale Nepali text data using Selenium and BeautifulSoup.
- Contributed to an agentic assessment platform using LangGraph for multi-agent workflows; maintained production apps such as Lekhandas (App Store) and mentored new AI team members.

Tech Beetle Technology | Kathmandu, Nepal | 5 June 2023 – 22 December 2023

AI/ML Developer (NLP)

- Designed and implemented Retrieval-Augmented Generation (RAG) pipelines, integrating vector retrieval, LLM inference, and prompt engineering to improve chatbot accuracy and contextual understanding.

- Collaborated with clients to design and implement LLM-powered chatbots, leading to a 30% reduction in customer service response time.

Fusemachines Pvt. Ltd | Kathmandu, Nepal | January 2023 – January 2024

AI Fellowship

- Developed machine learning models for house price prediction using regression techniques and feature engineering; explored satellite image-to-map conversion using GANs.
- Completed NLP and CV coursework and applied it in a chatbot project to create an interactive conversational agent.

NIC Asia, Trade Tower | Kathmandu, Nepal | January 2023 – March 2023

Data Science Intern

- Developed an MVP to extract citizenship and driving license information from customer onboarding documents using neural network architectures.
- Conducted business analysis and solution design for banking AI initiatives; researched AI applications and prepared technical documentation.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering

Himalaya College of Engineering, Institute of Engineering | IOE Partial Scholarship

Higher Secondary Education (Science)

Kathmandu Model College, National Examination Board

School Leaving Certificate

St. Xavier's School

TECHNICAL SKILLS

Languages: Python, JavaScript, C, C++, SQL (PL/SQL), HTML, CSS, Shell Scripting

AI & Machine Learning: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, NLP, Deep Learning, Machine Learning, Computer Vision, Speech Recognition, RLHF, LoRA, LangChain, LangGraph, Vector Databases

Frameworks & Libraries: React, FastAPI, Tailwind CSS, PyTorch, Hugging Face Transformers

Tools & Platforms: Git, Linux, macOS, Selenium, BeautifulSoup, Odoo ERP, Docker, AWS (EC2, S3, SageMaker)

PROJECTS

- **Reproduce GPT-2:** Reimplemented Andrej Karpathy's educational GPT-2 architecture to understand transformer internals and autoregressive training.
- **Tokenizer:** Designed and trained custom tokenizers using large-scale Nepali text scraped from online newspapers.
- **GRPO:** Implemented a lightweight version of Group Relative Policy Optimization for efficient RL-based LLM fine-tuning.
- **Obstacle Detection for Visually Impaired Persons:** Led development of an IoT and computer vision-based assistive system using transfer learning.
- **Machine-Learning-Foundation:** Built a collection of ML notebooks covering mathematical foundations, algorithms, and practical experiments.
