SUMMARY

AI/ML and full-stack engineer with 3+ years building and evaluating LLM systems — RAG pipelines, tool-calling agents, and training/inference workflows — alongside production web applications. Work spans LLM training research in PyTorch and Hugging Face, multi-agent orchestration with LangChain and LangGraph, and RLHF-based evaluation of code-generation agents for FAANG-level clients. Co-founder of a product shipped to 100+ users.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, C++, SQL (PL/SQL), HTML, CSS, Shell Scripting

AI & Machine Learning: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, RLHF, LoRA, NLP, Deep Learning, Computer Vision, Speech Recognition, Vector Databases

Frameworks & Libraries: PyTorch, PyTorch Lightning, Hugging Face Transformers, LangChain, LangGraph, FastAPI, Flask, React, Tailwind CSS, Selenium, BeautifulSoup

Tools & Platforms: Git, Docker, Linux, AWS (EC2, S3, SageMaker), GCP, Redis, Qdrant, Odoo ERP

EXPERIENCE

CreatorKhoj

Co-founder

Jan 2026 – Present

Kathmandu, Nepal

- Co-founded an MVP platform connecting brands with content creators for campaign discovery and collaboration; designed the end-to-end system architecture covering authentication, campaign management, and admin workflows.
- Onboarded 100+ content creators within the first month and facilitated early brand collaboration opportunities.
- Ran feedback cycles with creators and brands to prioritize features and iterate on the product.

Lazarus Studio

AI Engineer (Contract)

Feb 2026 – Jun 2026

Satdobato, Lalitpur

- Designed and implemented agent orchestration for social-media automation using multi-agent workflows, tool calling, structured outputs, and state management.
- Integrated LLM agents with external services and APIs to automate multi-step tasks, adding workflow control and output validation.

Invisible Technologies

Advanced AI Data Trainer (Full-Stack Developer)

Mar 2024 – Feb 2026

Remote, United States

- Built targeted datasets and full-stack coding tasks with prompt-engineered feedback to align LLM outputs with production development standards, improving reasoning and code generation for FAANG-level clients.
- Developed Docker-based execution environments and evaluated AI web-development agents (Firebase Studio Prototyper, Jules) by validating AI-generated applications against functional requirements.
- Maintained documentation for evolving project scopes and onboarded new team members on evaluation methodology.

Mindrift (Toloka AI)

AI Annotator

Freelance (Contract)

Remote

- Evaluated LLM outputs using RLHF methodologies and comparative response ranking, including agent reasoning across multi-step workflows.
- Assessed AI-generated images and video for realism, consistency, and motion quality.

Bajra Technologies

Associate Software Engineer, AI

Jan 2024 – Jul 2024

Kathmandu, Nepal

- Deployed an in-house speaker recognition model as a Flask-based inference API, improving accuracy from ~20% to ~86% on 2 of 3 evaluation subsets through architectural and data augmentation changes.
- Researched LLM training and inference pipelines for Nepali language components using PyTorch Lightning and Hugging Face; created custom tokenizers, evaluated transformer-based models, and scraped large-scale Nepali text with Selenium and BeautifulSoup.

- Contributed to an agentic assessment platform built on LangGraph in a GCP environment, and maintained production apps including Lekhandas (App Store).
- Developed reports and API integrations within the Odoo ERP ecosystem to streamline HRMS business workflows.

Tech Beetle Technology

Jun 2023 – Dec 2023

AI/ML Developer (NLP)

Kathmandu, Nepal

- Designed and implemented Retrieval-Augmented Generation pipelines combining vector retrieval, LLM inference, and prompt engineering to improve chatbot accuracy and contextual understanding.
- Collaborated with clients to design and ship LLM-powered chatbots, reducing customer service response time by 30%.

Fusemachines Pvt. Ltd

Jan 2023 – Jan 2024

AI Fellowship

Kathmandu, Nepal

- Built machine learning models for house price prediction using regression techniques and feature engineering; explored satellite image-to-map conversion using GANs.
- Completed NLP and computer vision coursework and applied it in a chatbot project to create an interactive conversational agent.

NIC Asia, Trade Tower

Jan 2023 – Mar 2023

Data Science Intern

Kathmandu, Nepal

- Developed an MVP to extract citizenship and driving license information from customer onboarding documents using neural network architectures.
- Conducted business analysis and solution design for banking AI initiatives and prepared technical documentation.

PROJECTS

- **AI Customer Operations** | github.com/sandeshjung/ai-customer-operations — Event-driven platform where LangGraph agents monitor delayed orders and triage support tickets. FastAPI backend and Redis Streams worker, hybrid BM25 + Qdrant retrieval with reciprocal rank fusion, human-in-the-loop approval guardrails, prompt-injection mitigation, OpenTelemetry tracing, and token/cost accounting.
- **Reproduce GPT-2** | github.com/sandeshjung/reproduce-GPT — Reimplemented and optimized GPT-2 training in PyTorch to work through transformer internals and autoregressive pretraining.
- **nanoGRPO** | github.com/sandeshjung/nanoGRPO — Lightweight implementation of Group Relative Policy Optimization for efficient RL-based LLM fine-tuning.
- **Tokenizer** | github.com/sandeshjung/Tokenizer — Byte-pair encoding tokenizers trained for two languages, including large-scale Nepali text scraped from online newspapers.
- **Machine Learning Foundation** | github.com/sandeshjung/Machine-Learning-Foundation — Collection of notebooks covering mathematical foundations, core algorithms, and practical experiments.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering

Himalaya College of Engineering, Institute of Engineering — IOE Partial Scholarship

Higher Secondary Education (Science)

Kathmandu Model College, National Examination Board

School Leaving Certificate

St. Xavier's School
